

Drug Screening

It is the STCC Nursing Department policy that students will be drug tested per the requirements of the affiliating clinical facility. As the student, you will pay for each required drug screening including the possibility of multiple repeat screenings. All students will be required to sign a Drug Screening release form. The student will be provided additional information regarding the policy and procedure. If the student refuses to abide by the drug screening policy, or the student drug test is positive (for prescription and/or non-prescription drugs), that student may be dismissed from the program.
